## **Risk Management Implementation**

Our company regularly convenes Risk Management Committee meetings and ensures that at least once a year, a special report on significant risk management issues is presented to the Board of Directors.

On March 9, 2023, and November 9, 2023, detailed briefings were given to the Board concerning the progress of a patent litigation case in the United States and customer credit risk management, among other important topics.

Annually, we conduct educational training related to corporate risk management for the core members of our risk teams. This initiative aims to enhance our employees' awareness of risks, strengthen the establishment of a corporate risk culture, effectively reduce the incidence of significant risk events, and enhance our response measures to risk situations.

We firmly believe that through such continuous and proactive efforts, we can create a safer and more robust operating environment for the company.
